RW-AW Series | Axle Weigher

The CAS RW-AW Series is a self contained, pit-type or above ground steel deck axle scale, featuring a 4" structural tubular steel cross-strut design. Vehicle weight is equally distributed over the entire scale surface for superior strength and durability. Combine with the landing gear module for continual checkweighing during loading/unloading.

Available in various platform sizes, the CAS RW-AW Series durable and versatile design allows it to be used for a multitude of different sized vehicles. Set up is simple with the RW-AW series unique pin and rail design. This scale locking system permits customizable configurations based on your application.

Servicing the CAS RW-AW Series is simple with easy top access to the polycarbonate NEMA 4X junction box mounted inside the tubular steel frame. Watertight connections protect the board and cables.

Whether in a pit or above ground configuration, weighing truck axles or landing gear for regulatory compliance, dispensing, or filling needs, the CAS RW-AW axle scale is designed to provide years of dependable service.

RW-AW Ramps

Standard asphalt package constructed with formed supports and diamond deck plate, pre-drilled lag downs, and leveling feet locators to firmly secure the scale in place.
